

Raindrop Technique

Raindrop Technique is an exciting new modality to enter Australia, which can be performed on its own, or in combination with other modalities. Its name derives from the art of dripping unadulterated, therapeutic-grade, high vibration, essential oils onto the body from a height (like rain), so the oils interact with the energy field and then the physical body. This was inspired by the Native American belief that drops of rain purify & cleanse the body and the spirit.

Raindrop Technique incorporates Ancient Egyptian healing principles, Swedish massage, and Vitaflex Technique (the Ancient Tibetan version of reflexology). During a Raindrop Technique session, Vitaflex is performed along the spinal reflex of the feet, using various essential oils - incredibly relaxing. Oils are then dropped on to the back, "feathered in" (in a spine-tingling motion adapted from Native American traditions), and then massaged in, using a variety of massage techniques that compliment each individual oil. This exotic combination makes for a sensational experience, which promotes deep relaxation and balance. Because the essential oils easily penetrate the skin and muscles, the technique works on deep levels of the body without requiring hard pressure or force

Your body will draw from the Raindrop Technique what it needs, so the results range from deep relaxation through emotional releasing to increased energy, vitality and a greater sense of well being. Professional Level Training Workshops for both individuals and professionals refer below. Click here to read an independent review.

Raindrop Technique Testimonials

I felt so light and revitalised after my treatment, all the stress had gone and the amazing thing was that I didn't feel like this for just the rest of the day, it stayed with me.

Lynne - Teachers Aide - Traveston

Next morning after my Raindrop my energy levels had increased greatly to my amazement and relief. My get up and go is back. Thank You.

Maureen - Retired - Pacific Paradise
